Attention: Mr. Tom Bateman, P.Eng., County Engineer

Re: Detroit River International Crossing (DRIC) Environmental Assessment Study

Dear Mr. Bateman:

Thank you for your comments dated December 8, 2008 submitted in response to the Draft Environmental Assessment (EA) Report made available for review between Wednesday, November 12, 2008 and Friday, December 12, 2008.

Your concerns on the topics of the Todd Lane/Cabana Road West intersection operations, tunnel lengths, the trail network and the proposed northbound freeway off-ramp at Labelle Street have been addressed in a letter dated December 9th, 2008, which responded to your comments of June 9, 2008 and was mailed to you prior to receiving your comments on the draft EA Report. A copy of our December 9th letter is enclosed for your convenience. We trust it adequately addresses the County's concerns on these issues.

The Environmental Assessment Report (the EA Report), which reflects comments received from all stakeholders during the review period noted above was filed with the Ontario Ministry of the Environment (MOE) on December 31, 2008. This report has also been circulated to external stakeholders including relevant agencies, municipalities, and First Nations, and has been made available for public review at a number of locations within the study area (refer to enclosed *Notice of Submission of Ontario Environmental Assessment*). Anyone wishing to provide comments on the EA Report must submit their comments in writing and/or by fax to the Ministry of the Environment by **Friday February 27, 2009**. All comments must be submitted to:

Catherine McLennon, Special Project Officer

During future design stages, the Partnership will continue to consult with the public, as well as agency and municipal stakeholders, on various aspects of the DRIC Study. In particular, there will be more opportunities to discuss specific design treatments for noise berms and/or barriers, the urban and landscape design of the parkland areas, and related construction issues.

The contact information for the County of Essex will remain on our contact list and you will receive study updates and be notified in advance of upcoming meetings and events related to this project. If you have any further comments or require additional information, please feel free to contact the undersigned.

Yours very truly,

A handwritten signature in black ink, appearing to read "Murray Thompson", is written over a thin vertical red line.

NOTICE OF SUBMISSION OF ONTARIO ENVIRONMENTAL ASSESSMENT

DETROIT RIVER INTERNATIONAL CROSSING STUDY

The Canada-United States-Ontario-Michigan Border Transportation Partnership has completed the provincial Environmental Assessment for the Detroit River International Crossing (DRIC) study. As required under section 6.2(1) of the Ontario Environmental Assessment Act and according to the Terms of Reference approved by the Ontario Minister of the Environment on September 17, 2004, the study team submitted its Environmental Assessment to the Ontario Ministry of the Environment on December 31, 2008 for review and approval.

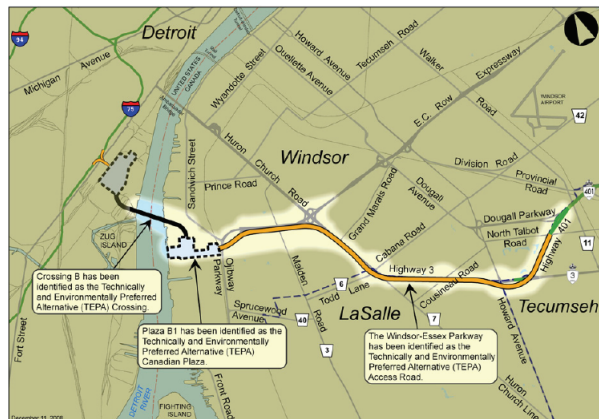

Windsor-Detroit is the busiest commercial land border crossing in North America. Reliable roadway connections and border crossings are essential for the secure and efficient movement of people and goods in this strategic international corridor. Improvements are needed to provide alternatives in cases of major incidents, maintenance operations, congestion or other disruptions at any of the existing border crossings.

Through extensive technical studies and public consultation, the DRIC study team has identified The Windsor-Essex Parkway, along with a new customs plaza and international bridge in the Brighton Beach industrial area of west Windsor as the Recommended Plan. The DRIC study is a bi-national planning study being conducted in accordance with the requirements of the Ontario Environmental Assessment and the Canadian Environmental Assessment Act in Canada, and coordinated with the U.S. National Environmental Policy Act in the United States. The Ontario Ministry of Transportation (MTO), in coordination with Transport Canada, has led the Environmental Assessment study in Canada, and retained URS Canada Inc. to assist in this undertaking.

The improvements recommended in this study include:

- A new six-lane freeway linking Highway 401 to a new inspection plaza and border crossing;
- 11 tunnels covering 1.8 km of the new freeway;
- A green corridor that provides more than 300 acres of parkland and 20 km of new recreational trails;
- A new four-lane service road;
- A new Canadian inspection plaza; and
- A new six lane bridge crossing the Detroit River.

As required under the Environmental Assessment Act, the Environmental Assessment will be available for public review and comment from Friday, January 9, 2009 to Friday, February 27, 2009.

The Environmental Assessment will be available for review during normal business hours at the following locations and can be downloaded from the study website at <http://www.partnershipborderstudy.com>
