# Conceptual Engineering Steps

- Additional Engineering Detail
- Refined Cost Estimates/Schedules
- Coordination with Context Sensitive Solutions

# Critical Design Criteria

- Navigation Envelope
- Cross-Section

# Design Criteria

## – Navigation Envelope

# Design Criteria

## – Proposed Cross Section

## – Future Design Allowance Cross Section

# X-10(B): Option 4

# X-10(B): Option 7

# X-11(C): Option 9

# X-11(C): Option 10

# Cost Estimate Basis

- Based on engineering of major components
- Based on quantities calculate from engineered components
- Unit prices from historical records and quotes from suppliers for major items
- Steel prices from North American suppliers

# Schedule

- Crossing X-10(B)
  - Option 4 CS: 42
  - Option 7 Suspension: 46 months
- Crossing X-11(C)
  - Option 9 CS: 41
  - Option 10 Suspension: 44

# Engineering Issues

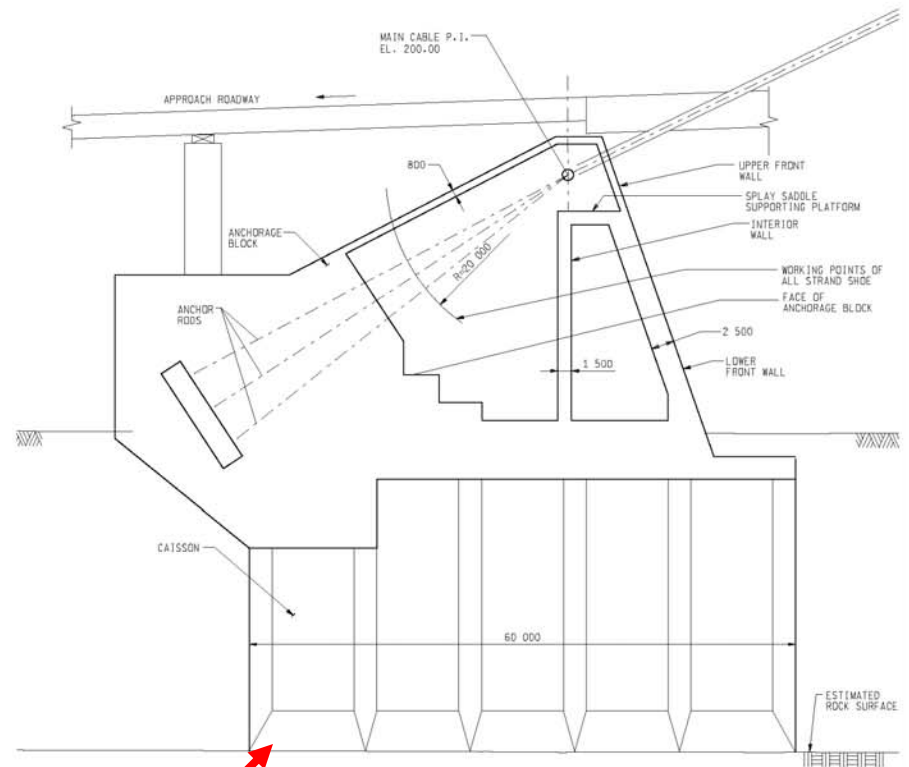

- General
  - Design criteria: Service life/Design life
- Suspension Bridge
  - Anchorage foundation design and construction
- Cable-Stayed Bridge
  - Transition from concrete to steel superstructure
  - Main Pylon foundation construction

# Anchorage Design

# Superstructure Transition

# CE Report Conclusions

- Both structure types are still valid at each crossing
- The significant differentiator between corridors is cost
  - Differentiators require additional analysis

# Preferred Alternative Next Steps

## Investigation

- Geotechnical subsurface investigation

## Analysis

- Anchorage/Pylon foundation
- Cost sensitivity to unit price volatility
- Superstructure investigation (CS)
  - Launching
  - Conc./steel transition
- Durability
- Security & Hardening
