

Dear Honorable Representative LaJoy;

March 22, 2006

As a high school student that has lived in Delray all my life I have seen many opportunities come and go, and I have been going to the meetings and workshops put on by MDOT concerning the DRIC study. I started going with my grandmother who has lived in Delray for fifty-four years. By attending these meetings I have found that MDOT is doing all they can to make this bridge responsible to our neighborhood and they are taking the time to be sure that this project is done well and correct. I ask you as someone that will live near the new crossing to let MDOT finish the study so that my neighbors and I can feel confident that the right decisions have been made.

Sincerely,

Krystal Nagy
